VOLUME II—NATIVE STATES

Report

To

THE SECRETARY TO THE GOVERNMENT OF INDIA,
DEPARTMENT OF REVENUE AND AGRICULTURE.

SIR,

I have the honour to submit the second volume of Agricultural Statistics for 1913-14. They deal with the Agricultural Statistics of Native States as far as reported. As in the previous issue, summary tables have been inserted to show the total figures relating to area, the classification of area, and the area under crops for each State or group of States and the totals for all the reporting States. Explanatory notes have been inserted at the foot of the tables. Two charts and an index for easy reference have been added to the volume. It should be noted that, for reasons explained below, the Agricultural Statistics of Native States are incomplete and are of far less accuracy than are those of British Provinces published in volume I.

The statistics are compiled from annual returns furnished by the State Durbars through the political officers. Information, so far as available, regarding the sources from which the figures are collected in the different States is given in the footnotes to the respective tables for each State. The statistics consist of six separate tables, namely, I—Area; II—Classification of area; III—Area under crops; IV—Live stock, ploughs, and carts; V—Land Revenue Assessment; and VI—Transfers of property in land. The totals of the figures given in tables I, II, and III are shown in a series of summary tables. The totals of tables IV, V, and VI are not shown in the summary tables, as they are very incomplete, owing to the absence of returns from a number of States. In addition to these tables there is an appendix which gives the meaning of vernacular terms used in the volume.

The total area of Native States in India is some 497,000,000 acres (777,000 square miles), with a population of 72 millions according to the census of 1911. These are divided for purposes of Agricultural Statistics into two main classes, namely, (1) States under the control of Local Governments and Administrations, and (2) States having direct political relations with the Government of India.

(1) *States under the control of Local Governments and Administrations.*—The total area of these States is 180,690,000 acres, with a population of some 27 millions. They are divided into the following main groups:—

	Area Thousand Acres	Population Thousands
Bombay States	40,843	7,412
Madras States	6,011	4,512
Punjab States	24,511	4,213
Bihar and Orissa States	18,335	3,945
Central Provinces States	19,960	2,117
Burma States (including Shan States)	39,024	1,540

	Area Thousand acres	Population Thousands
North-West Frontier Province States (including tribal areas)	16,390	1,379
United Provinces States	4,345	832
Bengal States	3,452	823
Assam States	7,970	346
Total	180,831	27,419

The total areas of all these States (with the exception of the Shan States in Burma and the tribal areas in the North-West Frontier Province) are included in the areas of the several British Provinces shown in column 2 of Table I of Volume I (British India), but are shown separately in column 3 of that table in order to arrive at the net area of British territory (in column 5) dealt with in that volume. Of these States, agricultural statistics are available only for the following twenty-eight States in the Madras Presidency and the Punjab and are dealt with in this volume :—

	Area Thousand acres	Population Thousands
<i>Madras States—</i>		
Travancore	4,043	3,429
Cochin	949	918
Pudukkottai	754	412

Total	29,133	8,526

(2) *States having direct political relations with the Government of India.*—
These are divided into the following main groups :—

	Area Thousand acres	Population Thousands
Hyderabad	52,927	13,375
Baroda	5,236	2,083
Mysore	18,855	5,808
Kashmir	54,036	3,158
Rajputana States	82,552	10,530
Central India States	49,515	9,357
Baluchistan (Native)	51,462	420
Sikkim	1,804	88
Total	316,387	44,767

No agricultural statistics are available for Hyderabad, Baroda, Baluchistan (Native), or Sikkim. Of the remainder, returns are received only from the following eighteen States :—

	Area Thousand acres	Population Thousands
Mysore	18,855	5,806
Kashmir	54,036	3,158
<i>Rajputana States—</i>		
Jaipur	9,971	2,637
Bikaner	14,922	701
Marwar	22,410	2,058
Tonk	1,634	303
Alwar	2,038	792
Kishangarh	519	87
Bharatpur	1,203	559
Jhalawar	527	96
Kotah	3,638	639
<i>Central India States—</i>		
Gwalior	16,511	3,102
Indore	6,080	1,008
Bhopal	4,657	730
Rajgarh	614	127
Narsingarh	469	110
Barwani	754	109
Nagod	324	75
Total	159,252	22,097

The total area of all the forty-six reporting States thus amounts to 188,385,000 acres, with a population of nearly 31 millions. These States, therefore, represent 38 per cent of the total area, and 43 per cent of the total population, of all the Native States in India. The dates from which the returns of Agricultural Statistics have been prepared in these forty-six reporting States are as follows :—

Mysore	1886-87
Jaipur	1892-93
Gwalior	1896-97
Bikaner, Marwar, Tonk	1898-99
Alwar, Bharatpur, Kishangarh, Jhalawar, Kotah	1900-01
Indore, Rajgarh, Narsingarh, Nagod, Patiala, Jind, Nabha, Bahawalpur	1907-08
Pudukkottai, Banganapalli, Sandur, Cochin, Travancore, Bhopal, Barwani, Simur, Kalsia, Patandi, Loharu, Dujana, Kapurthala, Malerkotla, Faridkot, Simla Hill States (11 in number)	1908-09
Kashmir	1910-11

It will thus be seen that owing to this gradual increase in the number of reporting States, the statistics for the year of report (1913-14) are strictly comparable only with those of the immediately preceding three years, namely, 1910-11, 1911-12, and 1912-13. It may be noted here that arrangements are being made by His Highness the Nizam's Government to prepare agricultural statistics for the Hyderabad State. The statistics for this State, when prepared will fill the biggest gap in the Agricultural Statistics of Native States in India.

The period covered by this volume is the quinquennium ending 1913-14. The returns for the different States, however, relate to the years ending the dates

stated below, so far as information is now available :—

Bikaner, Sandur, Banganapalle	year ended 31st March
Indore	" in June
Mysore, Gwalior, Nagod, Pudukkottai, Rajgarh	" 30th June
Travancore, Cochin	" in August
Jaipur	" 31st August
Kishangarh	" 15th September
Marwar, Kotah, Jhalawar, Bhopal, Barwani	" 30th September
Tonk, Narsingarh, Bharatpur, Alwar	" 31st October

Table I,
Total area.

From the total area of all the forty-six reporting States (188,385,000 acres), deduction must be made for 106,489,000 acres for which statistics are not available. These comprise chiefly unsurveyed areas and lands held on jagir, muafi, and other privileged tenures. The net area actually covered by these statistics is, therefore, only 81,896,000 acres by professional survey,* or 82,449,000 acres according to village papers.*

uses other than agriculture, amounts to 20,124,000 acres or about 25 per cent. The balance, 52,299,000 acres, or 63 per cent, represents the area available for cultivation. Of this, 16,033,000 acres, or 19 per cent of the total area, represent culturable waste, *i.e.*, land available for cultivation but not taken up, and 7,508,000 acres, or 9 per cent, were kept fallow in the year under report. The net area actually cropped in the year was thus 28,758,000 acres, or 35 per cent of the total area, as against 30,397,000 acres in the preceding year. This net cropped area (28,758,000 acres), however, excludes areas cropped more than once in the year. If areas cropped more than once are taken as separate areas for each crop, the gross area cropped in the year of report amounts to 30,646,000 acres as against 32,513,000 acres in the preceding year.

Irrigation.

The total area irrigated in the reporting States in 1913-14 was 5,736,000 acres as against 5,933,000 acres in the preceding year. Of this, 1,931,000 acres were irrigated from Government canals, 632,000 acres from private canals, 832,000 acres from tanks, 1,267,000 acres from wells, and the remaining 1,074,000 acres from other sources of irrigation. These figures, however, do not take into account areas cropped more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. If areas cropped more than once are counted as separate areas for each crop, the gross area of irrigated crops amounts to 6,300,000 acres, against 6,408,000 acres in the preceding year. Of this area, 5,400,000 acres, or 86 per cent, were under food crops and 900,000 acres or 14 per cent under non-food crops.

Table III,
Area under crops.

	Thousand acres	Per cent of total	year, or a decrease of 6 per cent. The different classes of crops and the area occupied by each, so far as details are available, are stated in the margin. Of the total cropped area, food crops occupied about 24,554,000 acres or 82 per cent and non-food crops about 5,532,000 acres or 18 per cent. Of the food-crops, food grains (cereals and pulses) occupied as much as 22,715,000 acres or about 76 per cent of the total cropped area, and other food crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food crops) together occupied some 1,839,000 acres or only 6 per cent of the total. crops, oilseeds occupied 1,694,000 acres or 5·6 per cent of the total cropped area, fibres such as cotton, hemp, etc., occupied 1,847,000 acres or 6·1 per cent of the total, and fodder crops occupied 1,369,000 acres or 4·6 per cent. The other non-food crops—dyes, drugs and narcotics (tobacco, tea, coffee, opium, etc.), and miscellaneous non-food crops—together occupied some 622,000 acres or 2·1 per cent of the total.

The area under food grains (22,715,000 acres) showed a net decrease of 1,774,000 acres or 7 per cent as compared with the preceding year. The

actual increase or decrease under each kind of grain is stated in the marginal table.

It will be seen that only rice and jawar showed an aggregate increase of 85,000 acres, while all the other food grains showed an aggregate decrease of 1,859,000 acres.

Oilseeds (linseed, sesamum, rapeseed, mustard, etc.) showed a decrease of 357,000 acres or 17 per cent. The area under condiments and spices decreased by 33,000 acres or 13 per cent and that under drugs and narcotics by 64,000 acres or 22 per cent. On the other hand, the area under sugar increased by 1,000 acres, that under fibres (cotton, hemp, etc.) by 313,000 acres or 20 per cent, and that under fruits and vegetables by 90,000 acres or 18 per cent.

The total extent of land on which more than one crop was raised during the year was 1,888,000 acres as against 2,116,000 acres in the preceding year.

Tables IV, V, and VI are very incomplete, as figures for these tables are not furnished by many of the reporting States. Table IV is prepared by only eighteen States, namely, Mysore, Cochin, Gwalior, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Nagod, Bikaner, Marwar, Jaipur, Kishangarh, Alwar, Bharatpur, Jhalawar, Tonk, and Kotah. According to the latest statistics, the total number of live-stock of the bovine class (bulls and bullocks, cows, buffaloes, and calves) in these eighteen States is 14,012,000, that of the ovine class (sheep and goats) 8,307,000, and that of horses and ponies, mules and donkeys, and camels 411,000. The numbers of ploughs and carts are 1,874,000 and 528,000, respectively.

Table V (Land revenue) is prepared by sixteen States, namely, Mysore, Cochin, Gwalior, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Bikaner, Marwar, Jaipur, Alwar, Bharatpur, Jhalawar, Tonk, and Kotah; and Table VI (Transfers of land) is prepared by only four States, namely, Mysore, Cochin, Barwani, and Alwar.

The Appendix explains vernacular terms used in this volume, and the charts illustrate (1) the classification of the total area showing the proportion of cultivated and uncultivated lands, and (2) the total area cropped in 1913-14 with shares of food and non-food crops.

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding Departments in Southern India. In States where there has been no professional survey, the figures are based on the best information available.

Column 3.—In this column is deducted the entire area for which the statistics required for Tables II and III are not forthcoming in whole or in part. This area comprises chiefly estates held on privileged tenures which have not yet been surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develops, the area in this column is reduced, and that entered in the next columns (4 and 5) and dealt with in Tables II and III is correspondingly increased.

Columns 4 and 5.—Column 4 is a check on the accuracy of column 5. In the latter, "village papers" means "the papers prepared by the village accountants." In States where no village papers exist, or where the source of information is the same for both the survey and the village papers, the figures in column 4 are necessarily repeated in column 5. The area in village papers may differ somewhat from that given by the Survey Department, (a) because, while the survey area is calculated in block, the area by village papers represents the added total of field and village areas; and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads is not always uniform in the two sets of returns.

(a) The statistics collected in 1908-09 have been repeated for 1909-10, 1910-11, and 1911-12, as information could not be collected owing to pressure of work connected with the revenue settlement of the State.

(b) Previous year's figure repeated.

(c) Column 3 states the area of unsurveyed forests.

(a) Column 2 states the area of the State as ascertained by revenue survey. Column 3 states the entire area of jagir villages.

(b) Column 2 excludes forest areas, the area of forest villages managed by the Forest Department, and about 6,080 acres of unsettled jagir villages.

(c) Column 3 states the areas of jagir and other alienated lands.

(d) Column 2.—As there has been no revenue survey so far, this column states the area of the State according to the best information available. Column 3 states the areas of jagir and musft villages, the boundaries of which have been demarcated, but for which the statistics required for other tables are not available. Columns 4 and 5.—In the absence of any revenue survey data, the figures in column 5 are repeated in column 4.

(e) Returns for 1910-11 having not been received, the figures for 1909-10 have been repeated.

(a) Column 2 states the area of the State according to Settlement records

(b) Statistics are furnished by eleven States of this group, namely, Peshawar, Jubbah, Thag, Kumbharsain, Khanoti, Bilaspur, Baghal, Ghund, Mehlog, Baghat, and Madhan, the last two but one from 1910-11 and the last one from 1911-12. They represent about 86 per cent of the aggregate area of all the States comprised in the group. The returns, however, relate only to the settled portions of the reporting States, except Bilaspur, Baghat, and Mehlog for which complete returns have been received. Column 2 states the area of the settled portions of the States named above, except Bilaspur, Baghat, and Mehlog for which the whole area is included.

(a) Column 2 states the area of the State as ascertained by revenue survey. Column 3 exhibits the area of jodi, kayam-gutta and sarvamnayam villages, and jagirs for which the statistics required for the other tables are not available at present. Column 5.—The figures in column 4 are repeated

(b) Column 3 states the estimated areas of jagir, muafi, ubari, tanka, istamrar and such other villages as are still unsurveyed

(c) Column 2 states the whole area of the State excluding the areas covered by the Indore Residency, the Mhow Cantonment and the Hiralpur Thakurats. Column 3 states the areas of jagir, istamrar and forest villages, and also of some of the outbandi villages

(d) Column 3 states the areas of jagir and such other villages as are still unsurveyed; it also includes the areas which formerly were parts of jagir villages, but which, after the completion of the settlement operations, either lapsed to or were resumed by the State

(e) Column 3 states the areas of jagir and such other villages as are still unsurveyed. It also includes the area of those khalsa villages which have not yet been regularly assessed; these are chiefly the latest acquisition to khalsa under the law of escheat. Columns 4 and 5.—The area by village papers does not differ from the area by survey, for, although differences occur under the different classes of soil, the total area of each village is the same in both cases

Column 2.—The definition of the term "forests" is as follows:—"Any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area cropped), an explanation being given in a note

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads or otherwise appropriated to uses other than agriculture

Column 4 includes groves not classed in the cropped area. Areas under bamboos and thatching grass, when not forming part of forest areas, are included in this column

Columns 8 to 13 state the area actually irrigated during the year, areas cropped more than once being counted once only

(a) See note (a) on page 6

(b) Column 2 states the area of reserved forests within surveyed villages

(c) Column 2 states the areas of forests left unassessed. Forests in this State having not been demarcated, figures in columns 3 and 4 also include same forest areas. Column 4 states areas of land left uncultivated for over three years, of *bar* (grass lands) and of pasture lands. Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is three years

(d) Includes 8,215 acres in coffee estates

Column 2 states the areas of State and district forests and of plantations.

Column 3 includes not only lands absolutely unfit for cultivation, but also lands reserved for pasture, and plantations intended for public use and therefore left unassessed. A large portion of the pasture lands is fit for cultivation, and is given out for cultivation from time to time under special orders, such lands when given out for cultivation being transferred from column 3 to 5 or 6 as the case may be.

Column 4 states unoccupied assessed waste.

Column 5.—There is no system of fallows, that is, lands are not systematically left uncultivated for the purpose of giving them rest. Individuals occupy large areas and pay full assessment thereon, leaving portions uncultivated, generally for the use of their cattle. For purposes of account the difference between the areas of the lands occupied by individuals and of those actually cultivated by them is taken as fallow. The lands occupied and assessed are sometimes unfit for cultivation, having been taken up on full assessment merely for use as pasture; but the exact area of all such lands cannot be ascertained, though it cannot be large.

(a) Included in column 3

Bharatpur—Column 2 includes grass preserves (locally called the State *Rundhs*) and hills. Column 4 includes areas out of cultivation or which have not been cultivated for the last four years or upwards, but exclude State grass preserves (*Rundhs*). Column 5—the maximum period for which land thrown out of cultivation is reckoned as fallow is three years. Column 8 includes area irrigated from the Baiteta Bund, constructed by the State Public Works Department

Note—In this table are entered the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by higher authorities.

(a) See note on page 47

(b) The areas under mixed crops are shown under the principal crop, as it is not possible to differentiate the areas of the respective crops

Entry 2 (a).—Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where such areas are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population head 10. Areas should not be entered in this column merely because the assessment due from them has been suspended or remitted on account of short crops, or for other special reasons.

Entry 3.—This column should be sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste.

Entry 4.—Where land revenue includes the zamindar's share, the net demand should be entered, and the table should state the payment due by the zamindars to Government, not those by the raiyats to the zamindars. The actual realisable demand on account of the year should be entered, after excluding arrears for past years. This column should include all the heads classed as "Land Revenue" in the Civil Accounts.

Entry 5.—The population in entry 5 is that of the last general census.

†Narsingarh.—Item 1 states the net area by revenue survey as shown in column 4 of Table I. Item 2 (a) includes forest areas (column 2 of table II) and unculturable (column 3 of table II) and culturable land not possessed by any cultivator. Item 2 (b) states the area of minor muafis. Item 3 (b) includes fallow lands left uncultivated for three years or less as full cultivation rate is assessed on them.

* These are *khalsa* or state lands only. The whole area of the State according to the census of 1901 is stated in Table I No. 5

† Not reported

** *Alwar*.—The classes of tenure are zamindari and village communities, the former comprising *zamindari-bil-ijmal* and the latter *pattidari* and *bhaiyachara*. Item 1 states the area by village papers (column 5 of table I). Item 2 (a) shows areas covered with forests (column 2 of table II) which are wholly revenue-free.†† *Jhalawar*.—The whole area stated in this table is classed as "Khatedari," and "Watendari" equivalent to "raiyyatwari" and "zamindari," respectively. Item 1 excludes entire villages held by jagirdars and udaldars.

Column 4 (b) states not only the area actually under crops, but also fallow lands as revenue rates are assessed on the total cultivated area, including fallows. Hence the area stated in this column exceeds the total area in table III.

Columns 5 and 6 relate only to Khalsa areas, as statistics for these columns are not available for the whole area of the State.

Column 1.—The State area leased to cultivators for a fixed term is returned as *raiayatwari*. The area leased out on condition of proprietary rights being given to lessees if they reclaimed land within a fixed term is returned as *zamindari—temporarily settled*; and the rest of the area (i.e., the area remaining after deduction of the raiyatwari and the temporarily-settled zamindari areas from the total area), is entered as *zamindari—permanently settled*.

Column 3 includes muafi, chauth, and istimrar areas.

Column 6.—The population stated is that of the last census.

Column 11 shows the total population in cases where separate figures for areas fully and not fully assessed are not available.

Note.—It is optional with the local authorities to enter or omit transfers of lands held by tenants. The following rules have been prescribed for the preparation of this return:—(1) Changes of entry due to succession, partitions or simple mortgages, are not really transfers and should be excluded from the table, as also should redemptions of mortgage. (2) All temporary transfers, such as leases, should also be excluded, but mortgage with possession should be treated as a transfer and entered in the table. (3) All transfers made by order of a court should also be included in the table. (4) The word "court" in the entry "by order of court" should be held to include a revenue court.

(a) Mysore.—Only permanent transfers are included as by sale or gift, in which the parties concerned apply for and obtain transfers of revenue registry in the village accounts from which the table is compiled. Thus, changes of registry under orders of civil and revenue courts as well as those effected in consequence of the sale of land for arrears of Government revenue are included.

(b) Alwar.—Transfers by mortgage with possession, sale, and gift, both of proprietary and of occupancy rights, whether by order of court or by private contract, are shown in this table. Property confiscated by order of a criminal court, and holdings transferred by order of a civil or revenue court in satisfaction of money decrees or arrears of land revenue respectively are thus included.
